

AMD-2005 Laparoscope

Features

- Flat field, linear optical system to prevent "fish eye" or "barrel image" distortions at the periphery
- Illumination fiber matched to imaging optics for best possible lighting
- Large and bright field of view
- 10mm diameter with 0°, 30° and 45° angles of view
- 315mm working length
- ETO gas is able to be sterilized and is soakable in disinfectants
- Multi-adaptor light post to accommodate most fiber optic cables
- Connects to AMD-400s Camera and Illumination System
