

Naso-Pharyngoscope

AMD-2040

The *Naso-Pharyngoscope* is designed for examinations of the upper airway from the nasal passage to the vocal cords. This specialty scope combines high precision multi-lens optics with an exceptionally maneuverable insertion tube into one remarkable instrument.

Product Features:

- Wide angle, multi-lens optics provides optimal image quality.
- Internal insertion tube strain relief increases working length of this scope, while still providing protection of the upper section of the thin insertion tube.
- Depth marks located at 10 cm and 20 cm from the distal tip of the insertion tube, help guide the examination.
- Tip deflects up to 140° in each direction, when the articulation lever is rotated.
- Ergonomically designed handpiece allows for one hand operation (left hand version available).
- Instrument is completely soakable and designed for gas sterilization.
- Integrates to AMD's Camera & Illumination System for premium light source and enhanced image quality (also compatible with any standard c-mount ACMI, Wolf, or Storz light source or camera attachments).

Technical Specifications:

3.2 mm Flexible Naso-Pharyngoscope

Conventional Image Bundle: 7,000 pixels

Diameter: 3.2 mm

Working Length: 300 mm

Tip Deflection: 2x 140°

Length of Movable Tip Section: 20 mm

Viewing Direction: 0° wide angle

Field-of-View: 70°

Depth of Field: 6 -1,000 mm

Included Components: flexible naso-pharyngoscope, transport case, leakage testing, and light guide.

3.8 mm Flexible Naso-Pharyngoscope

Conventional Image Bundle: 12,000 pixels

Diameter: 3.8 mm

Working Length: 300 mm

Tip Deflection: 2x 120°

Length of Movable Tip Section: 25 mm

Viewing Direction: 0° wide angle

Field-of-View: 85°

Depth of Field: 6 -1,000 mm

Included Components: flexible naso-pharyngoscope, transport case, leakage testing, and light guide.

Pair the Naso-Pharyngoscope with AMD's Camera & Illumination System for Superior Image Clarity and Quality.

- High-quality illumination with LED Light Source
- One-touch white balance
- Unique edge enhancement
- Compatible with nearly all c-mount optical instruments
- Integrated camera and light system
- Durable construction
